

The Valley *Renewal*

**Presentation to the
Village of Ridgewood Planning Board**

May 1, 2007

The Valley Renewal: Communications

Cultivating Our Future

Will it Thrive? Season?

Not without help.

Today The Valley Hospital is facing the question of how to preserve established, high quality healthcare services in a time of rapid change.

Technological advancements, new methods of healthcare delivery, advancements in medical and surgical care and new standards for healthcare facilities have prompted us to develop a long-range plan for the Valley campus – a plan to carefully replace some of our aging facilities and modernize our operations.

We call it the Valley Renewal.

The Valley Hospital is planting seeds for its future – so we can be there for yours.

We're committed to the well-being of our community.

A New Day

The journey for that new breath, healthy and strong, but in need of care, care, attention, and guidance.

Valley Hospital could also be considered in the infancy. Despite a well-established reputation for many years of high-quality health care services, we are facing a new day marked by new thinking, change in the world of healthcare services. It means we are reaching an exciting, and strong, business model of moving us to be prepared in the new challenges ahead.

Technological and medical procedural advancements, new healthcare delivery methods, new changes, and new health care standards have prompted us to develop a long-range plan for the Valley campus – a plan to carefully replace some of our aging facilities and modernize our operations.

We call it the Valley Renewal.

We were young once, and we have to be again, if we are to remain the Valley Hospital you know to be among the finest health care providers in New Jersey.

We're committed to the well-being of our community.

The Life Cycle.

Even at her age, this little girl knows the transition in her hand is the last stage of one life and the first stage of the next.

So does Valley Hospital, which is facing the question of how to preserve its ability to provide high-quality healthcare services in a time of rapid change.

Technological advancements, new methods of healthcare delivery, advancements in medical and surgical care and generally accepted standards for healthcare facilities have prompted us to develop a long-range plan for the Valley campus – a plan to carefully replace some of our aging facilities and modernize our operations.

We call it the Valley Renewal.

For our community, our neighbors, our patients, and the inevitable cycle of life.

We're committed to the well-being of our community.

Renewal

An Initiative of...
The Valley Hospital
Valley Health System

Today, one of the three Valley Hospital buildings are in the later stages of their life span.

TOMORROW, we envision a modern campus – one that is greener, better organized, and is constructed within existing 4-story limits.
