

LYMPHEDEMA SERVICES AT VALLEY

The Valley outpatient occupational and physical therapists provide skilled interventions to patients diagnosed with lymphedema of upper and or lower extremities through Complete Decongestive Therapy (CDT). CDT is comprised of thorough education in managing your diagnosis as well as developing a treatment plan that includes manual lymph drainage, appropriate recommendations for compressive therapies, and establishing a home exercise program.

Our Certified Lymphatic Therapists

All certified lymphatic therapists at Valley are trained in successful management of lymphedema through the Norton School of Lymphatic Therapy. Additionally, we hold certifications through LANA-Lymphology Association of North America and PORI-Physiological Oncology Rehabilitation Institute.

Our Services and Skills:

- ✓ Manual lymph drainage
- ✓ Compression therapy
- ✓ Exercise
- ✓ Skin/wound care
