

WE WANT YOUR FEEDBACK

We're excited to introduce our virtual assistant designed to help answer your questions related to your cardiac device and assist with remote monitoring support.

You're invited to use our virtual assistant!

To access our virtual assistant:
Scan the QR code below or visit:

epchatbot.vhs.care

VA Can Help With:

- Troubleshooting your remote monitor
- Answering frequently asked questions
- Guiding you through device clinic resources

After testing, please take a minute to complete a short survey and share your feedback about your experience with our virtual assistant. Your input is valuable and will help us improve the chatbot and enhance the quality of support we provide. Thank you for taking a moment to help us serve you better.
