

HAVING A BABY CAN BE ONE OF THE MOST joyous and fulfilling experiences in life. But expectant parents also face a number of important decisions like selecting a doctor, creating a birth plan and choosing a maternity hospital. The best hospitals provide mothers and babies with the highest quality care from pregnancy to birth and even postpartum. To help you pick the best hospital for your family's needs, *Newsweek* and global market research and consumer data firm Statista are proud to announce our ranking of "America's Best Maternity Hospitals 2023." Our list names the top 384 leading hospitals for maternity care in the U.S., divided into two performance categories: five-ribbon hospitals (159) and four-ribbon hospitals (225). Within each category, hospitals are listed in alphabetical order.

The evaluation is based on three data sources: a nationwide online survey in which hospital managers and maternity health care professionals (e.g., neonatal care providers and OB/GYNs) were asked to recommend leading maternity hospitals; medical key performance indicator data relevant to maternity care (e.g., a hospital's rate of cesarean births) and patient satisfaction data (e.g., how patients rated a hospital's medical staff for responsiveness and communication).

We hope you find this ranking useful when choosing the right maternity hospital for your family.

Nancy Cooper, Global Editor in Chief
